

Objective: Young Research Exchange Program

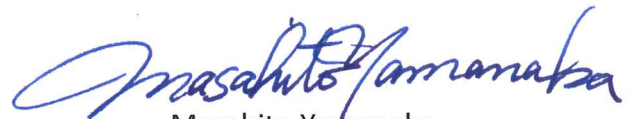

Dear Member,

the International Cold Forging Group promotes the *Young Research Exchange Program - YSEP* to support the international mobility of young scientists between the Institutions of the ICFG members for developing joint research projects in the field of cold forging. ICFG will support the travel and the accommodation expenses of the project up to 2.500 Euro for an exchange period of minimum 3 months.

The call will be exceptionally open till the end of 2018 to award two young scientists who will propose excellent research programs between our members.

All the details can be found at the address <https://www.icfg.info/activities/exchange-program.html> I hope you will be able to encourage your young coworkers to apply to this initiative and, if possible, I kindly ask you to get this message also to your colleagues.

Best regards,

Masahito Yamanaka

ICFG Chairman
