

LIST OF CONTENT

Volume 1

Session 1C: Keynote session I

Wilson, W. R. D. <i>Modelling Tribology in Computer Simulations of Forming Processes</i>	1
Childs, T. H. C. <i>Friction Modelling in Metal Cutting</i>	15

Session 5C: Keynote session II

Ike, H. <i>Report on Metal Forming Tribology Research in Japan with Special Focus on Environmental Aspects</i>	29
Lonardo P. M., De Chiffre, L. and Bruzzone A. A. <i>Characterisation of Functional Surfaces</i>	39
Groche, P. and Köhler, M. <i>Development and Application of Functional Surfaces</i>	63

Session 10C: Keynote session III

Dohda, K. <i>Future Trends of Tribology in Manufacturing</i>	73
---	----

Session 2D: Cutting: Friction, lubrication and wear phenomena

Chandrasekaran, H. , Granfors, M. and M'Saoubi, R. <i>Tribological Aspects of Tool-chip and Tool-work Contact in Machining and the Application of Laser Spectrometry</i>	85
De Chiffre, L. <i>Influence of cutting conditions on chip side curl</i>	93
Attanasio, A., Gelfi, M., Giardini, C. and Remino, C. <i>Minimal Quantity Lubrication in Turning: Effect on Tool Wear</i>	103
Itoigawa, F., Childs, T. H. C., Nakamura, T. and Belluco. W. <i>Effects and Mechanisms in Minimal Quantity Lubrication Machining of an Aluminum Alloy</i>	111
Brinksmeier, E., Walter, A., Giwerzew, A. and Bleil, N. <i>Characterization of Lubrication and Friction Phenomena in Grinding</i>	119
Kermouche, G., Rech, J., Hamdi, H. and Bergheau, J. M. <i>Numerical and experimental approach of surface integrity during belt grinding</i>	129
Session 3D: Cutting: Testing of friction, lubrication and wear	
Badie-Levet, D., Dal Santo, P. and Robert, P. <i>Mechanical and Thermal Behaviour of the Tool-Material Couple in the Process of Turning with Active Cutting Coolants and Lubricants</i>	137

Murayama, K., Inasaki, I., Suda, S., Sugimoto, F. and Wakabayashi, T. <i>Application of a Multifunctional Fluid to Environmentally Friendly Machine tools</i>	145
Sonoda, K., Sunagawa, Y., Naridomi, M. and Ishibashi, A. <i>Performance of Used Engine Oils in Metal Forming and Metal Cutting.....</i>	153
Fromentin, G., Poulachon, G. and Moisan, A. <i>Influence of Lubrication on Form Tapping</i>	163
Yang, L. J. <i>The Effect of Contact Area on the Wear Coefficient of Tungsten Carbide in Turning Carbon Steels.....</i>	171
Zuperl, U. and Cus, F. <i>Tool Wear Estimation in End Milling by Using the Adaptive Neuro-Fuzzy System..</i>	179
Session 4D: Cutting: Modelling of friction, lubrication and wear	
Filice, L., Umbrello, D. and Micari, F. <i>FE Analysis of Tool Wear in Orthogonal Cutting</i>	187
Moriwaki, I., Sugimura, K. and Nakada, S. <i>Tool Wear of Gear Shaving Cutter (Evaluation of Edge Radius from SEM Images).....</i>	195
Felder, E. and Rouault de Coligny, P. <i>Experimental and numerical simulation of the interaction abrasives/matter in the wiresawing of silicon plates</i>	203
Dechjarern, S., Hibberd, R. and Weerasinghe, V. <i>Effects of Surface Roughness on Friction and Wear Behavior of Coated Cutting Tools: Experimental Approach</i>	211
Dechjarem, S., Busso, E. and Hibberd, R. <i>Effects of Surface Roughness on Friction and Wear Behavior of Coated Cutting Tools: Numerical Approach</i>	219
Session 6D: Surface engineering I	
Matsumura, T., Ono T., Yoshino, M., Umehara, N. and Akagami, Y. <i>Glass Machining for Manufacturing a New DNA Chip with Engineering Surface.....</i>	227
Yoshino, M. and Aravindan. S. <i>Development of High Absorption Functional Surface by Nano Forming.....</i>	235
Akagami, Y. and Umehara, N. <i>Development of a New Polishing Method using Abrasive Motions Controlled by Dispersion Type Functional Fluid under AC Electric Field.....</i>	243
Umehara, N., Minemura, T. and Yoshino, M. <i>New evaluation method for surface energy and wettability with μm size liquid droplets</i>	251
Gisario, A., Quadrini, F. and Tagliaferri, V. <i>Laser surface hardening of fluidized bed machined steel components</i>	259
Barletta, M., Santo, L. and Tagliaferri, V. <i>Wear and surface finishing of components manufactured by using the sintering process</i>	267

Session 7C: Surface engineering II

- Nilsson, M. S., Olsson, D. D., Petrushina, I., Andreasen, J. L., Bay, N., Christensen, E. and Bjerrum, N-J.
Development of strategic surface topographies for lubrication in sheet forming of stainless steel275
- Popp, U. and Engel, U.
Micro Texturing of Cold Forging Tools – Influence on Tool Life.....285

Session 9D: Cutting: Tool coatings and wear

- Settineri, L., Bugliosi, S., Gautier, G. and Peiretti, F.
Mechanical Characterization of Nanocomposite Coatings for Cutting Tools293
- Balaji, A. K. and Mohan, V. S.
On the Effects of Tool Coatings on Tool-Chip Interfacial Contact in Machining.....301
- El Mansori, M., Fouilland, L., Ayadi, I., Lordache, L. and Pierron, F.
High Speed Machinability of Cobalt-base Weld hardfacing for Hot Tooling.....309
- Bissacco, G., Hansen, H. N. and De Chiffre, L.
Effect of Cutting Parameters on Microhardness in 2 mm Slot Milling Hardened Tool Steel317

Volume 2

Session 2C: Forming: Friction, lubrication and wear phenomena I

- Dubar, L., Dubois, A. and Dubar, M.
Friction and wear phenomena in cold metal forming: an integrated approach325
- Sutcliffe, M. P. F., Combarieu, R. and Montmitonnet, P.
Plane Strain Compression Tests of Aluminium Strip under Boundary Lubrication Conditions.....339
- Yoshida F. and Hamasaki H.
Determination of Plasticity Properties of Metal Surfaces and Coatings by Micro-Indentation.....347
- Picqué, B., Mouret, S., Bouchard, P.-O., Montmitonnet, P. and Picard, M.
Mechanical behaviour of iron oxide scale: experimental and numerical study355
- Meng, Y., Hu, B. and Chang, Q.
Control of Local Friction of Metal/Ceramic Contacts in Aqueous Solutions with an Electrochemical Method363
- Le, H. R., Sutcliffe, M. P. F., Wang, P. Z. and Burstein, G. T.
Development of Metal-to-Metal Contact in Forming of Aluminium with Boundary Lubrication.....369

Session 3C: Forming: Friction, lubrication and wear phenomena II

- Azushima, A.
In Situ 3D Measurement of Lubrication Behavior at Interface between Tool and Workpiece by Direct Fluorescence Observation Technique377

Wang, Z., Dohda, K. and Haruyama, Y. <i>Effects of Lubricant Velocity and Sliding Velocity on Friction Behavior in Stainless Steel Sheet Rolling</i>	385
Klocke, F., Messner, G., Giardini, C. and Ceretti, E. <i>FE-simulation of micro-tribological contacts in cold forming: experimental validation</i>	395
Azushima, A., Kuba, S., Tani, S. and Olsson, D. D. <i>Direct Observation of Asperity Deformation of Specimen with Random Rough Surface in Upsetting Process</i>	403
Ike, H. <i>Surface Nano-/Microgeometry Formed by Plastic Deformation with Interfacial Sliding and Bulk Plasticity</i>	411
Kitamura, K. and Niimi, T. <i>Change of Contact Ratio in Multiple Stage Cold Forging</i>	419
Session 4C: Forming: Testing of friction and lubrication I	
Jeswiet, J., Arentoft, M. and Henningsen, P. <i>Methods and Devices used to Measure Friction</i>	427
Nakamura, T., Tanaka, S., Hayakawa, K., Sugisawa, M., Aoyama, K. and Shibata, J. <i>Tribo-Characteristics of Stainless Steel Sheets in Iterative Processes of Sheet Metal Forming</i>	437
Olsson, D. D., Bay, N. and Andreasen, J. L. <i>Development of a quantitative lubricant test for deep drawing</i>	445
Valberg, H. and Uyyuru, R. K. <i>New accurate experimental techniques to quantify metal flow inside workpiece – and along boundary interface of workpiece - in metal forming</i>	453
Uyyuru, R. K. and Valberg, H. <i>Friction Induced Material Flow in Plane Strain Compression Test</i>	465
Session 6C: Forming: Development and characterization of lubricants	
Dauchot, G., De Castro E., Repoux, M., Combarieu, R., Montmitonnet, P. and Delamare F. <i>Application of ToF-SIMS Surface Analysis to Tribochemistry in Metal Forming Processes</i>	475
Meiler, M., Pfestorf, M., Merklein, M. and Geiger, M. <i>Tribological Properties of Dry Film Lubricants in Aluminium Sheet Metal Forming</i>	489
Ahluoos, T., Parikka, R., Kupiainen, V. and Varjus, S. <i>Tribological properties of Environmentally Acceptable Lubricants for Metal Working Applications</i>	501
Schmid, S. R., Yang, H., Kasun, T. J. and Reich, R. A. <i>Developments in Emulsion Lubrication</i>	509

Zajec, B., Vižintin, J. and Podgornik, B.
Influence of Emulsion on Sticking of Lamellas after Heat Treatment.....521

Session 7D: Forming: Modelling of friction, lubrication and heat transfer I

Felder, E. and Frascati, F
Experimental and theoretical analysis of the behaviour of the glass coating lubricating a hot forging operation531

Lee, J. H., Son, I. H. and Im, Y. T.
A Design Guideline of Multi-pass Equal Channel Angular Extrusion for Uniform Grain Distribution.....539

Session 9C: Forming: Testing of friction and lubrication II

Engel, U.
Tribology in Microforming549

Hu, Z. and Vollertsen, F.
Scaled Friction Test Integrated in Deep Drawing561

Dubois, A., Deltombe, R., Dubar, M., Morgado, N. and Dubar, L.
Warm drawing simulation of 6060 T6 aluminium: a new way to identify friction parameters569

Andreasen, J. L., Olsson, D. D., Chodnikiewicz, K. and Bay, N.
Bending Under Tension Test with Direct Friction Measurement.....577

Session 11C: Forming: Tribology assisted or tribology controlled processing

Siegert, K. and Hengelhaupt, J.
Controlling the Metal Flow by Using the Friction between Sheet Metal and Die in Deep Drawing Processes589

Steinhoff, K.,
Self-organizing Tool Surfaces for Metal-working Processes.....605

Wang, Z. J., Liu, J. G. and Wang, Z. R.
The Role of Interface Adhesive Friction Stress during Viscous Pressure Forming (VPF).....613

Groche, P. and Nitzsche, G.
Reduction of friction and wear in deep drawing of aluminum-alloys by generating local hydrostatic pressure lubrication.....621

Session 11D: Forming: Tool materials and tool coatings

Klocke, F., Maßmann, T., Lugscheider, E., Bobzin, K. and Bagcivan, N.
Carbon based tool coatings as an approach for environmentally friendly metal forming processes629

Bobzin, K., Lugscheider, E., Maes, M. and Krämer, A.
Tribological Investigations of Two Different Graded Zirconium Carbide Films Having Regard to Load, Temperature and Varying Atmosphere.....641

M'Saoubi, R., Fernandez, A., Heikkilä, I., Wiklund, U. and Merstallinger, A.
Adhesion and Friction in Sliding Contact between Stainless Steels and Cemented Carbides.....649

Langlois, L., Bigot, R., Ettaqi, S. and Bonin, D.
*Bi-Material Die manufactured from a Bi-Material Sheet obtained by Explosion
Cladding*657

Session 12C: Forming: Modelling of friction, lubrication and heat transfer II

Kuzman, K. and Gantar, G.
The Influence of Lubricant Selection on the Stability of Deep Drawing Process.....665

Rosa, P. A., Rodrigues, J. M. C. and Martins, P. A. F.
Invert-Forming of Thin-Walled Tubes Using a Die.....677

Liu, J., Schmid, S.R. and Wilson, W. R. D
A Three-Dimensional Heat Transfer Model for Forging687

Stupkiewicz, S. and Marciniszyn, A.
*Modelling of Asperity Deformation in the Thin-Film Hydrodynamic Lubrication
Regime*695

Shimizu, I., Martins, P. A. F., Bay, N., Andreasen, J. L. and Bech, J. I.
*Influence of Lubricant Pocket Geometry upon Lubrication Mechanisms on
Tool-Workpiece Interfaces in Metal Forming*703

Cassarini, S., Laugier, M., and Montmitonnet, P.
Modelling of Metal Forming Lubrication by O/W Emulsions713

Session 12D: Forming: Testing of friction and lubrication III

Im, Y. T., Kang, S.H. and Cheon, J. S.
*A Novel Technique of Friction and Material Property Measurement by Tip Test
in Cold Forging*721

Henningsen, P., Arentoft, M. and Wanheim, T.
Measurements of Normal and Friction Forces in a Rolling Process733

Johnsson, A.
Cold Rolling Tests of Lubricants741

Huart, S., Dubar, M., Deltombe, R., Dubois, A. and Dubar, L.
*Skin-pass of galvanized strips: mastering of contact conditions to optimize the
process*.....747

Brenon C., Boude S., Fischer C., Lebrun J.-L. and Reszka M.
Friction Characterization and Importance in Sheet Metal Forming.....755

Wang, Z., Nakamura, T., Ueda, N. and Obika, T.
Tribo-performance of Lubricant Pre-coated Steel Sheet in Bowden Test.....765
